"Respectable" Unionism

The new style of labor unions in the United States is not the same as the old. It is different in many respects, and what makes it so different is that the new unions are not afraid to fight for their members. The old labor unions were afraid to fight for their members because they knew that if they did, they would lose their jobs. The new unions are not afraid to fight for their members because they know that if they do, they will win their jobs.

Wake Up Slaves!

There is nothing in the whole universe of man to compare with the power of the workers as a class. The might of all the world's armies and navies combined, would be as nothing if opposed by an organization of workers. The workers have power to win a fair wage, to win a fair day's pay for a fair day's work. They have power to win a better world, a world free from oppression and poverty and war. They have power to win a world of peace and plenty and happiness. They have power to win a world where all men are equal and free. They have power to win a world of justice and righteousness. They have power to win a world of freedom and democracy. They have power to win a world of peace and plenty and happiness. They have power to win a world where all men are equal and free. The Preamble of the Industrial Workers of the World

The working class and the employing class have nothing in common. They differ in every essential part of their lives and interests. They are in opposition in every part of their dealings. The history of all hitherto existing society is the history of class struggles. Freemen and slaves, master and servant, pounders and workers, rich men and poor men, the ruling and led, are class against class. The working class, which is the producer of all wealth, is the source of all power; its strength is in its unity; its weakness is in its disunion. To make the working class conscious of this and organized as a class against the exploiting classes is the great mission of our time.
